Project: Review and Audit of Feasibility Study of Aynak Copper Mine Project
 Ref. Number: NPPD/MoMP/1405/ICB/NC-1057
 Procurement Entity: Ministry of Mines and Petroleum (MOMP)

Delivered Date: May 5, 2026

Response Date: 9/5/2026

No	Bidders' Questions	Entity's (MOMP) Responses	Added clarification to the RFP
1	<p>We understand that detailed technical reports will be made available to the selected consultant after the bidding stage. However, even at the tender stage, it would be important to have at least a general overview of the project, including its current status, the scope of available data, key technical parameters, and the reporting standards being applied (e.g., JORC or NI 43-101). Without such preliminary information, it is difficult to properly define the scope of work, determine the appropriate team structure, and prepare a sound technical and financial proposal.</p> <p>We would therefore appreciate it if you could share any summary information or documentation currently available related to the feasibility study. This would greatly assist us in conducting an initial assessment and preparing a more accurate and competitive bid.</p>	<p>Thank you for your inquiry and for your interest in participating in the assignment titled "Review and Audit of the Feasibility Study – Aynak Copper Mine Project."</p> <p>Please be advised that the Terms of Reference (TOR) already provide a general overview of the project, including its background, objectives, current status, scope of services, and principal technical aspects. As outlined in the TOR, the Aynak Copper Mine Project is presently at the Feasibility Study stage.</p> <p>In addition, information relating to the scope of available data and several key technical parameters has been addressed through both the TOR and the clarification responses previously circulated to all interested entities.</p> <p>Regarding the reporting framework adopted for the Feasibility Study, kindly note that, the applicable standards are those based on generally accepted mining industry practices.</p> <p>It is therefore expected that the information made available through the TOR and the issued clarifications will provide interested firms with a sufficient basis to define the proposed scope of work, establish an appropriate team structure, and prepare their technical and financial proposals accordingly.</p>	<p style="text-align: center;">Added clarification to the RFP</p>
